Summary

Motivated B.Tech Computer Science Engineering student with a strong foundation in Core Java, Object-Oriented Programming, and data structures. Developed console and database-driven applications utilizing Java, JDBC, and MySQL. Seeking a Java development internship to contribute to real-world software projects and enhance backend development capabilities.

Skills

Java

Core Java

OOP

Collections Framework

Exception Handling

Multithreading

File I/O

JDBC

C

C++

HTML

CSS

MySQL

Servlets

IntelliJ IDEA

VS Code

Maven

Git

GitHub

Jupyter Notebook

Arrays

LinkedList

Stack

Queue

Recursion

Sorting algorithms

Education

IILM University, Greater Noida

B.Tech - Computer Science Engineering

Greater Noida

Projects

•Java Learning Repository (Ongoing)

Structured GitHub repository documenting Java concepts from basics to advanced.

Well-organized programs covering OOP, Arrays, Strings, Collections, Exception Handling and Multithreading.

Includes clean code, explanations, and consistent commits.

•Student Management System (Upcoming)

Java | JDBC | MySQL

Console-based CRUD application.

Database connectivity using JDBC.

Modular architecture using Object-Oriented Programming.

Authentication and menu-driven interface.

•Object Detection using YOLO

(Academic Project)

Built an object detection system using YOLO.

Worked on dataset preparation, model training and evaluation.

Gained practical exposure to Computer Vision workflows.

Soft Skills

Problem Solving | Analytical Thinking | Willingness to Learn | Time Management | Team Collaboration
